

STOP SMOKING PROGRAM

About 30 to 50 per cent of smokers will develop lung disease or cardiovascular disease or both. Trying to stop smoking should not just be seen as an aspiration like buying a car or beautiful clothing.

To achieve long term abstinence, the process to quit should be perfectly prepared and integrated into your personal lifestyle. The Clinique La Prairie program offers you a multi-faceted approach with high success rates.

THE FIRST STEP IS A SUPERVISED AND TARGETED MEDICAL CHECK-UP

- A chest physician evaluates your personal needs and with you, creates an individually tailored program together with timescale
- Detailed pulmonary function testing gives important results for therapy
- Low dose high resolution CT of the chest with a calcic score of the coronary arteries helps to rule out cancer and coronary heart disease
- Cardiologic check-up with stress test completes the calcic score
- Personalised support and management including: medication, nicotine substitution, relaxation techniques, therapeutic hypnosis and acupuncture

OUR PACKAGE INCLUDES

- Six nights from Sunday until Saturday including full board
- One medical check-up: laboratory analysis, abdominal ultrasound, ECG
- Medical evaluation by a lung specialist, daily follow up and nursing care
