

# CLINIQUE LA PRAIRIE

---

SWITZERLAND

Clinique La Prairie's commitment is to help and inspire our guests to live a healthier, longer and better life. Our holistic approach to health uses a combination of progressive medical expertise, and an exciting collection of traditional and alternative philosophies. All our programs are built on our pillars of longevity science: longevity medicine, nutrition, wellbeing & movement.

CLP Nutrition unit focuses on the nutrition and diet of our clients across the lifespan in relation to health, wellbeing and longevity. We continuously seek science based concepts and innovative strategies to apply advanced understanding in order to improve our proprietary protocols and health solutions portfolio, to generate new innovations and help to improve how nutrition at all ages contributes to nutrient status and

To reinforce our our team, we are looking to recruit our new:

## **Dietitians - with BA degree in Nutrition Sciences or recognition of Swiss Red Cross**

**EN/FR - based in MONTREUX**

**Mission:**

You will join a team whose objective is to

- regularly evaluate new possibilities in the field of preventive and individualized nutrition,
- structure a holistic and comprehensive approach based on cutting-edge technologies used at CLP such as genetics, epigenetics and longevity clinical assessments

You will provide personalized nutritional advice / guidance / care for our clients and / or patients including the management of medical and surgical patients while hospitalized. You will ensure the nutritional assessment (diseases, weight management, deficiencies, etc). You will ensure the ambulatory follow-up. You will ensure a multi-disciplinary collaboration with nurses, doctors, kitchen, and fitness team.

You will support the team to drive innovation and creativity with a « big-picture » mindset that unlocks the power of personalized nutrition, allowing us to develop breakthrough innovations, next generation nutrition solutions/products, advanced protocols that are unique to CLP philosophy.

## Requirements
